Slide 14: Liquidity Management

1. Interest rate on the facility is a formula-based calculation. If the Borrowing Base is less than 1.6x the Combined Debt Amount (i.e. 1.6x total commitments), the applicable margin is SOFR + 177.5 bps. If the Borrowing Base is great than or equal to 1.6x and less than 2.0x the Combined Debt Amount (i.e. 1.6x total commitments), the applicable margin is SOFR + 1.65 bps. If the Borrowing Base is greater than or equal to 2.0x the Combined Debt Amount (i.e. 2.0x total commitments), the applicable margin is SOFR + 152.5 bps. Interest includes a 10 bps CSA. Under the terms of this facility, the requirements for the lower drawn spread were satisfied following the submission of the latest borrowing base. As a result, the lower drawn spread will be applied to future borrowings under this facility
2. In connection with the note offerings, the Company entered into interest rate swaps to align the interest rates of its liabilities with its investment portfolio, which consists of predominately floating rate loans. In connection with certain notes repurchases, the Company entered into additional interest rate swaps to reduce the notional exposure of its existing interest rate swaps related to the notes to match the current principal amount of notes outstanding. As a result of the swaps, the effective interest rate (excluding OID) on the inaugural 2029 notes is SOFR plus 2.51%, the reopening of the 2029 notes is SOFR plus 2.22%, the 5.75% 2030 notes is SOFR plus 2.55% and the 6.125% 2030 notes is SOFR + 2.00%
