- (1) Adjusted for RCF amendment and extension closed May 1, 2026. The amount available may be subject to limitations related to the borrowing base under the Revolving Credit Facility, outstanding letters of credit and asset coverage requirements. Uncommitted accordion feature can increase total size to \$4.0 billion.
- (2) Interest rate on the facility is a formula-based calculation. If the Borrowing Base is less than 1.6x the Combined Debt Amount (i.e. 1.6x total commitments), the applicable margin is SOFR + 177.5 bps. If the Borrowing Base is greater than or equal to 1.6x and less than 2.0x the Combined Debt Amount (i.e. 1.6x total commitments), the applicable margin is SOFR + 1.65 bps. If the Borrowing Base is greater than or equal to 2.0x the Combined Debt Amount (i.e. 2.0x total commitments), the applicable margin is SOFR + 152.5 bps. Interest includes a 10 bps CSA. Under the terms of this facility, the requirements for the lower drawn spread were satisfied following the submission of the latest borrowing base. As a result, the lower drawn spread will be applied to future borrowings under this facility.
- (3) Completed \$150 million reopening of the outstanding 6.500% notes due 2029 on June 10, 2024; total issue size increased to \$750 million.
- (4) In connection with the note offerings, the Company entered into interest rate swaps to align the interest rates of its liabilities with its investment portfolio, which consists of predominately floating rate loans. In connection with certain notes repurchases, the Company entered into additional interest rate swaps to reduce the notional exposure of its existing interest rate swaps related to the notes to match the current principal amount of notes outstanding. As a result of the swaps, the effective interest rate (excluding OID) on the inaugural 2029 notes is SOFR plus 2.51%, the reopening of the 2029 notes is SOFR plus 2.22%, the 5.75% 2030 notes is SOFR plus 2.55% and the 6.125% 2030 notes is SOFR + 2.00%.
- (5) Daily average debt outstanding during the quarter/year divided by daily average net assets during the quarter. Daily average net assets is calculated by starting with the prior quarter/year end net asset value and adjusting for capital activity during the quarter/year (share issuance from capital calls / DRIP contributions).
- (6) Interest coverage defined as (LTM net investment income + LTM interest expense) / LTM interest expense. Interest & dividend coverage defined as (LTM net investment income + LTM interest expense) / (LTM interest expense + LTM regular dividends paid); excludes supplemental and special dividends paid. LTM net investment income is adjusted to exclude the capital gains incentive fee expense that was accrued, but not paid, related to cumulative unrealized capital gains in excess of cumulative net realized capital gains less any cumulative unrealized losses and capital gains incentive fees paid inception to date.
